

**Menadier Engineering, LLC** (386) 347-5133  
PO Box 636 www.menadier.com  
Alachua, FL 32616

**Position: PROJECT ENGINEER**

**Office Location:** 13800 Tech City Circle, Suite D-302, Alachua, FL

**Job Type:** Full-Time

**Industry:** Civil Engineering

Menadier Engineering is a full-service professional civil engineering firm serving the needs of our communities, municipalities, and developers. Our company is built on six core values, direct Communication, positive Enthusiasm, clear Focus, unshakeable Integrity, continuous Perseverance, and unmatched Dedication to our clients and those we serve in our community.

We're located in San Felasco Tech City in beautiful Alachua, Florida. With years of experience in residential, commercial, and infrastructure planning, along with grant procurement services, engineering, water resources and environmental consulting, limited surveying services, contract administration, construction management, and construction engineering & inspection (CEI), Menadier Engineering is structured to serve our clients from start to finish. Typical projects involve private sector site/civil design for residential, commercial, and industrial site development. Other projects include public municipal capital improvement projects such as utility expansions, roadway design, and parks & recreation support.

We are currently searching for a Project Engineer to support our growing demand. Self-motivation, the ability to collaborate with multiple team members, and project flexibility are imperative in our work environment. It is not uncommon to manage several projects at one time while meeting established deadlines. This is a great opportunity to join a growing team of professionals and tackle the engineering challenges that our clients look to us to solve head on. At Menadier Engineering, we are problem solvers.

**Education, Experience, Licensure, and Skills**

- Bachelor's Degree in Civil Engineering
- PE preferred
- Ability to use AutoCAD (Civil 3D preferred)
- Knowledge of stormwater modeling software (ICPR4, POND5)
- At least four years of experience with site planning and land development, stormwater analysis and design, utility design, and /or roadway design

**Main Responsibilities:**

Duties and responsibilities for the Project Engineer include, but are not limited to:

- Prepare and perform calculations, designs, reports, and related technical documents
- Understand land development codes and jurisdictional requirements to ensure compliance
- Familiarity with local, state, and federal permitting (City, County, WMD, FDEP, FDOT, etc.)
- Communicate with team members, clients, & permitting agencies
- Attend out-of-office meetings as needed

**To Apply:**

- Email Cover Letter, Resume and References to [acampbell@menadier.com](mailto:acampbell@menadier.com)
- In subject line please refer to job title and your last name
- Any questions or clarifications please email at the above email address or call (386) 347-5133
